

Superfast Fibre Broadband Is Now Available At Your Location From Just £40pm Don't Be Left In The Internet Slow Lane! Take Advantage Now!

Dear Local Business Owner,

Fibre optic cable has recently been installed by BT Openreach direct from the exchange to a street cabinet near your location.

This means you can now get superfast Fibre Broadband!

Chances are you're currently paying for a broadband speed you probably can't actually get or a service that's not right for your business requirements!

The trouble is, your broadband speed is affected by how far your location is from the telephone exchange. The further away you are, the slower your broadband – no matter what speed you signed up for! If you're very lucky you might actually get near to the fastest speed available using old style ADSL2 broadband, 24Mb. However the average download speed in the UK as of May 2010 was just 5.2Mb and average upload speeds were only approaching a miserable 500k!

With the introduction of Fibre Broadband things are changing!

In recent years BT Openreach have been forced to open up all of their networks to competition which includes the new Fibre service.

With our own business grade Fibre Broadband service running on top of BT's network **we can now deliver a blistering maximum 40Mb download speed and 10Mb upload speed direct to your location.**

That's a potential 8 times faster download speed over average broadband speeds and a whopping 20 times faster upload speed. (We can now also **guarantee** a minimum 12Mb download speed on any installed Fibre service).

Make a note of the potential 10Mb upload speed, for business users it makes a huge difference! If you exchange lots of emails or large documents and files with your customers then this is going to give you lightning fast send speeds.

**Upgrade Your Existing Broadband To Superfast Fibre
Broadband By Calling The Freephone Number Below...**

What we can do for you...

* We can test the distance of your line to the exchange and the actual quality of the line to give you a better understanding of what broadband service is right for your business.

* We can assess your router / modem, sockets & filters & phone wiring to ensure your own equipment isn't limiting your broadband service!

* We offer a range of Fibre broadband connections that we can tailor to your requirements based on the actual connection speed you're likely to get and what applications you use the internet for. As a guide our services are listed below...

* Black Sheep Fibre Standard:

A broadband service with **upto 40Mb Down and 10Mb up** speeds. Includes a **100GB monthly usage allowance** and 1 fixed IP address **from just £40 + Vat per month**. Suitable for most small businesses. (£39.50 + Vat setup applies).

* Black Sheep Fibre Pro:

A broadband service with **upto 40Mb Down and 10Mb up** speeds. Includes a **500GB monthly usage allowance** and 1 fixed IP address **from just £55 + Vat per month**. Suitable for heavy duty users. (£39.50 + Vat setup applies).

* Black Sheep Fibre Unlimited:

A broadband service with **upto 40Mb Down and 10Mb up** speeds. Includes an **unlimited monthly usage allowance** and 1 fixed IP address **from just £125 + Vat per month**. Suitable for the most demanding of users. (£39.50 + Vat setup applies).

NB A Minimum 12 month contract applies.

All the above services have a minimum Guaranteed throughput of at least 12Mb!

NB: You may need a new router/modem to connect to the new Fibre Broadband service, we can also supply these if needed.

Take Action Now!

We moved to our new base in the centre of Horwich (just around the corner from the RBS) in June 2009. Before that we'd been located along with our I.T company, Norbrook, first in Bury and then in the Westhoughton / Hindley area.

MD David Lloyd

"We've run a successful local I.T firm, Norbrook Direct, for over 12 years. We took the decision to start Black Sheep Business Communication (Norbrook's sister company) in mid 2008.

Over the last 2 years we've developed a range of telecom products and services for small and medium sized businesses.

**Martin Lloyd
Technical Director**

The move to Horwich has seen the business really take off and we look forward to helping many more local firms benefit from our services.

We've always been a family run business with a no nonsense, straight forward and honest approach. We think this has helped us enormously in building the trust of our local clients"

Our services aren't limited to simply supplying Fibre broadband!

* Via our I.T firm (Norbrook) we can offer all types of computer support & maintenance & New Server & PC installations.

* We can offer low cost phone calls and line rental.

* We're able to transfer existing phone lines, as well as arrange for new phone lines to be installed. (We can supply a complete portfolio of Single PSTN, PSTN Multi-Lines, ISDN 2 and ISDN 30 solutions for business users. All lines are installed and maintained using BT Openreach)

* We also supply and install new phone systems and can also take over the maintenance of your existing phone system. Just give us a bell, we're always happy to give unbiased help and advice. Tel 0800 092 5439.
